

# the better libretto

The [better](#) blog has become a bit leggy. Unless a post is on the front page, it is unlikely to be seen. In an attempt to help fix that, below is a list of posts by category. In the spirit of encouraging discovery, many posts appear in multiple categories.

Updates will be added manually, not automatically, which means they will happen whenever I have a moment. In the meantime, there *is* a search bar on the website. Scroll and browse!
